

08289 Magic 1 LAN Single Adapter

SOCKET | 1x GB LAN | 1200MBIT/S

Manufacturer: [DEVOLO](#)

Description

Invisible, but still there. devolo Magic 1 LAN makes magic reality. The simple, elegant [Powerline](#) adapter ensures that you can surf and stream at high speed anywhere in your house: the basement, the attic – wherever you want internet, you can get it from the wall socket at speeds of up to 1200 Mbps. Connect whatever terminal devices you want – Smart TV, console, or PC, for instance – to form a home network and enjoy magical internet from your wall socket.

Streaming, gaming or home office - whatever you want to do now or in the future, with devolo Magic 1 LAN, you're already equipped today for the adventures of tomorrow. Look forward to multimedia enjoyment with a little Magic added: the innovative Powerline technology gets you quickly and reliably onto the Internet in any room. With fantastically high speeds of up to 1200 Mbps, including over distances of up to 400 metres. You can connect your static devices such as smart TVs or consoles via the Gigabit LAN connection. Get going straight away thanks to devolo Magic 1 LAN's super-smart Plug & Play feature. Simply unpack, plug in and enjoy amazing connections. You can also keep a close eye on all devolo Magic adapters very easily via the innovative devolo App. Fantastic prospects for the digital future of your home - with devolo Magic 1 LAN!

Innovative technology

Fantastically uncomplicated and amazingly powerful. The devolo Magic 1 LAN adapter allows you to bring the future home. Surf and stream at high speed in any room in your home – devolo [Powerline](#) technology does the trick. As though through invisible channels, it carries the magical internet anywhere you need it. You don't need to worry about compatibility because existing routers are supported without any problem. devolo Magic 1 LAN is based on the sustainable G.hn standard and can be combined with any other Magic adapter. Existing dLAN networks can work at the same time without the systems interfering with each other. At transmission speeds of up to 1200 Mbps, the Magic adapter also offers fantastic streaming convenience: watch the latest blockbuster without any lags, stream for hours on multiple devices at the same time, or immerse yourself in gaming adventures – it is a new, magical era!

- Via unseen pathways: the innovative Powerline technology gets you on the Internet anywhere in the house via the fastest and most reliable route - for a multi-media experience of the very best quality.
- Fantastic performance: surf the net at up to 1200 Mbps! Streaming, gaming, home office - and all of them magically easier, faster and more reliable than ever before.
- All-in: connect your static devices such as smart TVs, consoles or PCs via the Gigabit LAN connection.
- We've thought of everything: thanks to the integrated power socket, you won't lose out on any power connections.
- Copes easily with long distances: effortlessly handles extremely long distances up to 400 metres so that you always have a strong connection. From the cellar to the attic and down to the garage - simply all through the house.
- Organises the setup: Simply plug into the power socket - and thanks to the smart Plug & Play, the adapters connect to each other in just a few seconds.
- Top-end technology from Germany: since 2002, devolo has been developing innovative products with passion for millions of happy, networked customers all over Europe. With more than 300 awards to its name.
- A real team worker: compatible with all routers, devolo Magic adapters and HomeGrid Forum-certified products. dLAN® Powerline adapters and other HomePlug AV products are not supported. Different technologies can be used in parallel in a single household.
- Our promise: 3-Year manufacturer's warranty

Please note: Compatible with all routers, devolo Magic adapters and HomeGrid Forum-certified products. dLAN® Powerline adapters and other HomePlug AV products are not supported.
