SEV 1203R SAT LINE AMPLIFIER

Manufacturer: [ANKARO](#)

Description

The SAT line amplifier is designed to combine the sat signals and terrestrial programs of the existing antenna installation to a common down-lead. The satellite signals are amplified. In order to compensate cable attenuations a 5dB equalizing filter is built-in.

- Input freq.:47-862MHz
- Attenuation: 0-2dB
- Input freq.: 950-2300MHz
- Gain: 17-22dB
- Adjust range:-18dB
- Max out level: 108dB
- Noise figure: 6-7dB
- Mains: 230V AC, 50Hz, 19V
- LNC-Power supply: 15V =, 300mA max
- Dimensions: 180x130x65mm
