RJ45 COMPRESSION PLIERS

Manufacturer: [Daxis](#)

Description

RJ45, RJ11, RJ12 and RJ22 crimping pliers compatible with through-hole technology.

Through-hole technology simplifies installers' processes by allowing the connector to be crimped and the wires to be cut in one movement.

- For RJ plugs type: 8P8C, 6P6C, 6P4C, 6P2C
- Length: 210 mm

Operating mode:

- 1. Place the pairs in order and insert them into the plug until they come out the front and the cable cover is inserted to the maximum within the plug
- 2. Check the order of the pairs in a simple and quick way
- 3. Use the crimping pliers and in a single operation crimp and cut the excess part of the pairs.

This model also incorporates cutting blades and an outer cover stripper with safety protection, and can also be used with conventional RJ11, RJ12 and RJ45 plugs.
