

## 08703 WiFi ac Repeater

WiFi Repeater+ ac

Manufacturer: [DEVOLO](#)

Description

### Product details

The devolo WiFi ac Repeater+ provides efficient emergency relief when your WiFi signal is weak. It extends your limited router signal in no time and will not leave you in the lurch in future, even in your favourite corner.

You can surf at home at up to 1200 Mbps with cross-room Mesh WiFi. The two LAN ports and integrated power socket of the devolo WiFi ac Repeater+ also offers flexible connection options.

No more worries about dead spots – the devolo plug-and-play solution brings WiFi just where you need it.

### Surf rooms away from your router with Mesh WiFi

You can now stream and surf wherever you want – extremely fast and without disconnections. Together with the router, the devolo WiFi ac Repeater+ forms a coherent WiFi network – with a shared password and shared WiFi settings. Quick plug and play lets you get started right away and finally enjoy a stable connection of up to 1200 Mbps, rooms away from your router.

devolo products adhere to the current encryption standards (WPA2/WPA3), ensuring that your data are protected (banking standard).

## **Supplies your terminal devices in a targeted manner with the best WiFi**

devolo WiFi ac Repeater+ is harmonised with your terminal devices: The WiFi signal is sent to smartphone, laptop, etc. in a targeted manner (beamforming). The available frequencies, 2.4 and 5 GHz, can be used flexibly (crossband repeating).

Multi-user MIMO technology ensures that you are using the best possible WiFi capacity when you are online with multiple devices.

## **Use all the advantages of devolo's product range for cross-room Mesh WiFi!**

**The devolo WiFi ac Repeater+ is compatible with all WiFi routers, access points, and WiFi-capable devices.**

### **Overview of advantages**

- Better wireless LAN ac-reception in any room – up to 1200 Mbps.
  - Quick data transmission: Crossband repeating optimises use of frequency bands (2.4 GHz and 5 GHz).
  - Beamforming sends the WiFi signal to your connected terminal devices in a targeted manner.
  - Uninterrupted surfing with Mesh: Repeater and router form a common network.
- 
- The integrated power socket means that you do not even have to sacrifice a power connection.
  - Two LAN ports connect all stationary devices to the internet more reliably.
  - The app makes installation extremely easy.
  - Compatible with all routers.
  - Three-year warranty.
