

DTVRR13

Module, 4 inputs DVBS/S2 - 8 tuners HDMI and/or USB input

Manufacturer: [ANTTRON](#)

Description

Module for receiving 8 DVB-S / S2 / S2X multistream satellite transponders.

The signals from the 4 satellite inputs can be individually switched to the 8 receiver tuners.

The HDMI input can only be used instead of or alternately for USB playback. It is possible to set the playback time of the files or the HDMI input by entering a timer.

- 4 inputs / 8 transponders
- USB connection for generating an information channel (*.ts video format)
- HDMI input with integrated MPEG4 multiplexer
- 13 / 18V - 22kHz - DiSEqC control per input
