

LNB LQP-04H

QUAD LNBF 0.1dB

Manufacturer: [Opticum](#)

Description

Opticum LQP 04H Quad LNB

- Noise figure: 0.1 dB
- Polarization: linear H/V
- Input frequency: from 10.7 GHz to 12.75 GHz
- Feed diameter 40 mm
- Waterproof: 100% tested

In order to convert the television or radio signal reflected inwards by the satellite antenna for reception by the receiver and then to feed it into the antenna cabling, there must be an LNB on each satellite antenna.

The Opticum LQP 04H Quad LNB receives two satellite positions and forwards the signal directly to your receiver / TV set with built-in DVB S2 tuner.
