INVACOM VIRTUAL TWIN MDU

Manufacturer: [GLOBAL INVACOM](http://www.globalinvacom.com)

Description

The FibreMDU Virtual twin, connects to a single fibre optic cable from a FibreMDU Optical LNB. This is done either through a network of passive optical splitters (PON) or directly from the LNB (with attenuation). Each Virtual Quad provides 2 universal feeds.

- **Converts an optical signal from a Fibre Optic LNB to IF**
- **Supports up to 2 satellite STB tuners from a single fibre optic connection**
- **'Plug & Play' technology**
- **Powered by the STB**
